slack , Zoom

PROJECTS

STOCK NEWS AGGREGATOR

Udemy 01/2024 - Present

- Developed a Python-based application to aggregate and analyze stock-related news articles.
- Implemented web scraping using BeautifulSoup and Scrapy to collect news from financial websites.
- Created a RESTful API for serving news data and sentiment analysis results.
- Utilized NLTK and spaCy for sentiment analysis to categorize articles.
- Integrated with stock price APIs (Alpha Vantage, Yahoo Finance) to correlate news sentiment with stock performance.
- Managed data storage with PostgreSQL and deployed the application on AWS. Ensured code quality with automated tests using pytest.

CLOUD-BASED INVENTORY MANAGEMENT SYSTEM BACKEND DEVELOPER, PERSONAL PROJECT

CloudAge pvt Ltd 10/2023 - 01/2024

- Developed an inventory management system using AWS to automate stock tracking and order processing.
- Designed and implemented RESTful APIs with Python and Flask for inventory operations.
- Utilized AWS services including EC2 for hosting, S3 for data storage, and RDS for managing MySQL databases.
- Integrated AWS Lambda functions for serverless processing and automated email notifications via Amazon SES.
- Implemented IAM policies to ensure secure access and management of AWS resources.
- Deployed the application using Docker for containerization, ensuring consistent environments across development and production.
- Monitored application performance and resource utilization with AWS CloudWatch.
- Ensured high availability and fault tolerance through multi-AZ deployments.
